March 19, 2007

I had the best SBC had to offer and still they let me down. They couldn't keep my service up and running when my business was. They offered me free upgrades along with a free month of service, hard to turn down. Looking back, I wish I had.

Discernity came along and I was up and running in no time. Their professional staff had me installed within days and the customer support has been outstanding. I pay a little higher monthly price but it's worth the peace of mind that my service will be running when I need it to.

I strongly recommend Discernity and their team.
